# REMOTE ACCESS

Download  
**MOBILE**  
**APP**

## What is Remote Access?

Remote Access is the service connecting your AXIS cameras with our CamStreamer Cloud. You can remotely access your cameras (no public IP or VPN needed), activate watchdog alerts, and manage cameras via a mobile app.

## How does Remote Access work?

After a short registration process in the CamStreamer Cloud, you simply add a camera to your account using the installation wizard. While your cameras are connected you can view and manage all cameras via our CamStreamer Cloud platform in your browser.

## What can you do with Remote Access?

### Use CamStreamer Cloud platform and mobile app

All your connected cameras are available on the platform whenever and wherever you want.

### Keep an eye on your cameras

CamStreamer Cloud monitors your cameras, apps, and live stream via watchdog alerts.

### Manage your users

Create more user accounts with defined authorization capacities.

## Features

Remote access to your cameras

No public IP or VPN needed

Mobile app for live view

Dashboards

User management

Watchdog Alerts

Cloud service

# RECORDING

## What is Recording?

Recording is a CamStreamer Cloud exclusive feature for recording live stream footage for storage in the CamStreamer Cloud, on SD card or both together.

## How does Recording work?

The footage is recorded at Full HD (1080p/30fps) and the recordings are available in the cloud for 30 days. Storing on SD card is without limit, can be even in 4K.

## What can you do with Recording?

### Browse all recordings for up to 30 days

All your recordings are available on the platform whenever you need them.

### Review faster with thumbnail images

When you move your mouse on the timeline you can see the preview in thumbnails without any click.

### Access recordings via mobile app

Recordings are available via web browser or mobile app for your mobile device (Android / iOS).

## Features

Your cloud storage

Local copy on the SD card

Easy video export

Instant thumbnail preview

Fast-playback

Mobile app in your pocket

## Cloud service

# TIMELAPSE

### What is TimeLapse?

TimeLapse is a CamStreamer Cloud exclusive feature for creating time-lapse videos at the maximum resolution of the camera.

### How does TimeLapse work?

TimeLapse periodically takes pictures at a set time and uploads the footage into the cloud with a local backup on the SD card. You can export videos with just a few clicks..

### What can you do with TimeLapse?

#### Create great marketing videos

Time-lapse videos are a great marketing tool for promoting construction projects and documenting building, landscaping, and refurbishing.

#### Export with just a few clicks

You can choose what parts of the video to export and transform into a time-lapse by selecting a specific time period, e.g. footage from 7 AM to 5 PM.

#### Utilize the maximum resolution of your camera

Exported time-lapse videos can be up to 4K or the maximum resolution of your AXIS camera.

### Features

Custom time-lapse image frequency

Local copy on the SD card

Auto-sync from SD card

1-click export video

Maximum resolution (up to 4K)

Fully compatible with our other cloud services

# Who is CAMSTREAMER?

- Czech company based in Prague
- AXIS technology partner for more than a decade
- Developer of embedded streaming apps
- Company with partners and customers worldwide
- Our focus - the media broadcast segment, automated streaming, 24/7 streaming, security segment

## How does the world see OUR APPS?

Our streaming applications are currently used in many areas all around the world. Thanks to our service you can watch live streams for example from church of St. Cyril and Methodius in Prague, animals in Melbourne Zoo, Australia, or various sports events like Dutch Junior Open at Amsterdam stadion.

"Live streams worked great with overseas audiences and received global attention. But, the majority of animals were asleep at night. We wanted to add something that people could enjoy even at night. With the help of the CamOverlay App we added QR codes to various live broadcasts overnight that would reroute people to the pre-recorded videos."

**Gigi Silk**  
Digital Communications Manager  
Melbourne Zoo, Australia

"The combination of CamStreamer software and an Axis camera seemed to be the only stable solution in the market. This combination allows live streams directly from the camera. Moreover, the CamStreamer App ran flawlessly, and the first live broadcast was set up within one hour after the camera was in place. The CamStreamer App definitely outperformed our expectations."

**Sander van der Brakel**  
Frans Otten Stadion, Amsterdam

"Without people in the church, for example during pandemic, we didn't have any money from collections, which is why the question of cost was an important one. NetRex (CamStreamer installation partner) responded to all our conditions very quickly and professionally and provided us with a solution we could afford. We've had very positive reactions to the live streams."

**Father Miroslav Cúth**  
St. Cyril and Methodius Church, Prague
