

**Automate
the streaming
of games**

 CAMSTREAMER

Stream Baseball, Softball, Basketball, Squash, and other sports to YouTube, Facebook, or other streaming platforms with ease.

Set the streams in advance, add logos and custom graphics, and integrate the score. Select the plan that best suits your needs.

1

Single-camera Solution

All you need is an Axis camera with streaming apps installed

One-time payment

2

Two-camera Solution

Two camera views
Automate or manual camera switching

One-time payment

3

Sports Solution

Mainly for baseball & softball
Ballclubz scoring
Match planning, recordings, tagging

Monthly fee

Every higher plan contains all features of previous one.

SINGLE-CAMERA SOLUTION

Simple setup

All you need is an Axis camera with streaming apps installed.

Easy start

Start live stream just by pressing one button. The stream can also be set up automatically based on a schedule.

Graphic overlays

Insert current status, information and sponsor logos into the stream.

Stream management

Control stream via web browser or mobile app.

How to start?

Buy CamStreamer Streaming & Graphics Bundle.

Install CamStreamer App, connect your streaming platform account (e.g. YouTube) and set your stream.

Install CamOverlay App which allows you to add logos, graphic, and set the scoreboard.

For basketball and squash buy and install CamSwitcher App for automated motion tracking on 4K camera.

Optionally get a manual stream start button, which allows anyone to start the stream even without access to the application.

TWO-CAMERA SOLUTION

Simple setup

All you need are two Axis cameras with streaming apps installed.

Easy start

Start live stream just by pressing one button. The stream can also be set up automatically based on a schedule.

Graphic overlays

Insert current status, information and sponsor logos into the stream.

Camera switching

Switch cameras manually or automatically.

Stream management

Control stream via web browser or mobile app.

How to start?

Buy our All Streaming Apps Bundle for the main camera and also CamOverlay App for the secondary camera.

Install CamStreamer App on the main camera and set your stream. Install CamOverlay App on both cameras to add logos, graphics, and configure the scoreboard. Install CamSwitcher App on the main camera to switch between cameras and enable live commentary.

Buy SportTracker App for automate camera switching based on AI motion detection for baseball and softball.

Optionally get a manual stream start button, which allows anyone to start the stream even without access to the application.

SPORTS SOLUTION

AI based switching

Based on software detection, it knows when a pitch is being thrown. At that moment, it switches to the second camera, which takes a close-up frontal view of the batter.

Ballclubz

Thanks to the integration of the BallClubz scoring platform used by the World Baseball and Softball Confederation, the status of the game is updated in real time. However, scores can also be entered manually.

Recordings & tagging

Each broadcast game is also recorded. Key moments such as a hit or a home run, can be marked in the recording and exported as a highlights compilation.

Stream & overlay management

Everything is controlled through a clear user interface, which is available both in the browser and in the mobile app.
