

# USE CASE - instructions

## Easy change of text and graphics in the Control Room

Switch between different versions of **displayed content** in your live stream quickly and all in one place. **The Control Room** is a part of the CamOverlay App. The app makes it easy to change text and graphics in the settings of **individual widgets**, which can be displayed or hidden using the Control Room. You can also have everything easily under control in your **mobile phone**. Add dynamics to the **live stream** of your sports events or church services, concerts and other live events. Explore our solution!

### What do you need?

- An [AXIS camera](#) (check compatibility [here](#))
- The [CamOverlay App](#)
- The [CamStreamer App](#) (you don't need this app for the widget, but it's excellent for setting up live broadcasts.

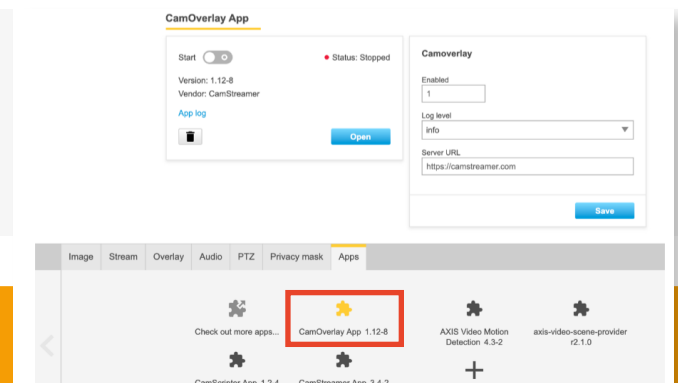

### Steps for set-up:

**1.** Sign into the camera's web interface. In the **Apps tab**, install the **CamOverlay App** and get free trial or buy a license for them at [www.camstreamer.com](http://www.camstreamer.com).

**2.** Open the user interface of the **CamOverlay App**. You can find the link in the AXIS camera interface. In the Apps tab near the application detail, click on the **Open button**.

**Tip:** A free 30-day license can be acquired for both apps on the [camstreamer.com](http://camstreamer.com). Try everything out before paying for the license.

More information about **CamOverlay App** you can find at [www.camstreamer.com](http://www.camstreamer.com).

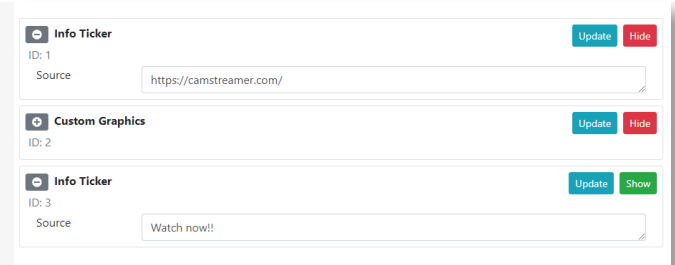

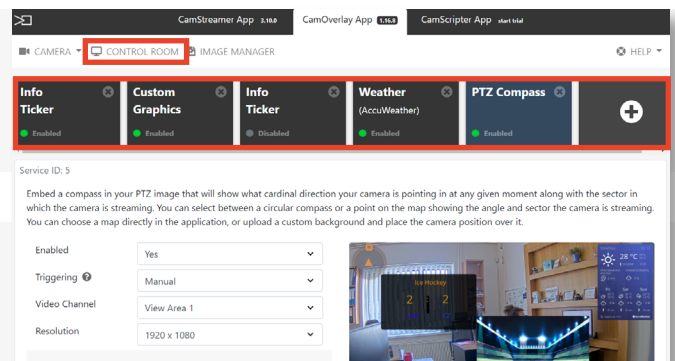

# USE CASE - instructions

## Easy change of text and graphics in the Control Room

**3.** In the **CamOverlay App** select desired graphics service from the list and set your widgets (Info Ticker, Weather widget, Images, etc.).

**4.** Choose the **CONTROL ROOM** icon in panel between **CAMERA** and **IMAGE MANAGER** icon.

**5.** All services will be displayed in a list. After clicking the green button **SHOW**, the content you've created will appear in the video. By pressing the red button **HIDE**, the video will be hidden. The blue button **UPDATE** confirms the change of text or graphics.

## In widgets, you can quickly and easily change text and content directly in the Control Room

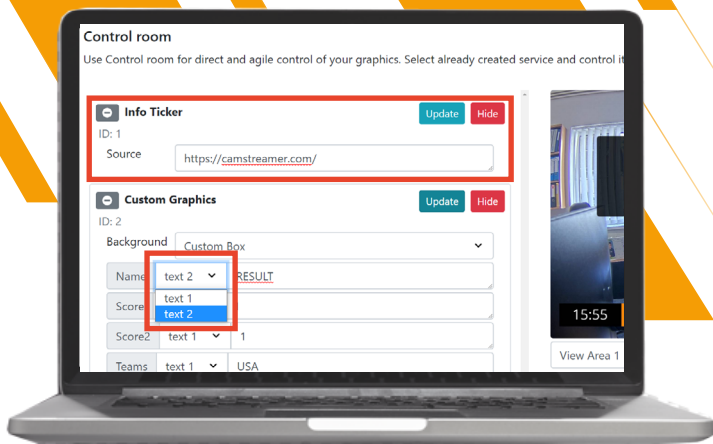

**Tip:** By using **+** / **-** before the name of the widgets, you can leave visible only those widgets whose content you need to change.

# USE CASE - instructions

## Easy change of text and graphics in the Control Room

Rewrite or paste the **copied text** directly into the text bar of the relevant widget.

In **Custom Graphics**, create various content options (text 1, text 2, text 3 - check instructions [here](#)) and switch between them in Control Room in the select box or change images in the background (Custom Box/Images).

**Tip:** You can change any data in text fields via [API commands](#) = easy and perfect connection with external data.

6. Done! Now you have all your streams under control and can quickly react to any changes!
