

USE CASE - instructions

Vimeo live integration

Are you looking for the platform where you can stream **without ads** with the option to easily embed video into websites and other marketing features? This function is a part of the Premium paid package, but offers a score of **advantages**. Setting up a live stream is simple and you can stream in high quality to social media and a website at the same time. Vimeo allows for **password protection**, so only selected people can watch the live stream. In addition, Vimeo offers the possibility of sharing a different screen in the live stream or incorporating a viewer via **chat** or live **Q&A**. Use this method to collect emails or call your viewers to action. Results can then be monitored thanks to **advanced analytics**. The **Premium account** does not limit live streaming or the number of viewers. With the CamStreamer App, you'll be streaming in no time thanks to very easy settings.

What do you need?

- An [AXIS camera](#) (check compatibility [here](#))
- Our [CamStreamer App](#)
- Account on [Vimeo](#) (30 days trial or \$75/Month)

Live stats	
Watching now	562
Peak viewers	314
