

Case study

# POS screen in video: Monitor what's happening at the checkout

Observe the real-time **checkout screen directly in the surveillance camera** feed. Examine cashier behavior in regard to processing items/goods. Thanks to this solution you have a **visual check** that no fraud is occurring.

Cashier PC  
+ installed  
ShareX app

Surveillance  
AXIS camera +  
CamOverlay App  
on-board

Surveillance AXIS camera + CamOverlay App on-board

## How does it work?

### Cashier PC

The ShareX application is **installed on the computer** running the POS software, which **sends the screen or a screen's view area to the surveillance camera**.

### Surveillance camera

The CamOverlay, in-camera app installed in the AXIS camera, which can **live feed the POS monitor screen into the output video image**.

### VMS or video storage

Either the camera image with or without the cash register monitor embedded or both at the same time is sent to the **existing recording or VMS storage**.

### Beauty of the solution

The entire solution is built on **software only**. **No hardware or special network setup** is required. Data is **sent securely within the local network**.
